THE NUMBERS TELL THE TALE!

Measure carefully before determining which size to make.

There can be differences between ready to wear sizes and sewing pattern sizes.

The bust circumference is the determining size for the shirt, use that measurement as a starting point.

Between 2 sizes? Go for the biggest one.

Size	32	34	36	38	40	42	44	46	48	50	52
Height	172	172	172	172	172	172	172	172	172	172	172

Dimensions finished pieces

This table offers an overview of how much ease is added to each size and the length of each garment.

The length of the shirt is the back neck to hem measurement.
 You can compare these measurements to a well fitting garment and make adaptations when necessary.
